

Muhammad Hassaan Saeed

Flutter Developer

☎ 0315-0611166 | ✉ hassaansaeed@gmail.com | 📍 Lahore, Pakistan

Final-year BSCS student at NUML, Lahore, building Android apps in Flutter. Have taken two apps from a blank project to a finished, testable build end to end, an AI based personal finance tracker and a shop-management app for local retailers, covering everything from UI to backend to ads. Currently looking for a Flutter developer role or internship at a software house.

PROJECTS

Finora - Personal Finance Tracker | Flutter · Dart · Firebase

- Built a complete personal finance app for Android, expense categorization, spending analytics, currency settings, and dark/light theme switching.
- Used Firebase Auth for sign-in and reauthentication (needed before letting users change their email or password), with Firestore handling real-time data sync.
- Added local notifications with flutter_local_notifications, spent a fair bit of time chasing down timezone bugs there, plus Google Sign-In.
- Integrated AdMob (banner, interstitial, and rewarded ads) for monetization, and fixed adaptive app icon rendering issues across Android versions.
- Tested on a Pixel 6 Pro; app is feature-complete and sitting ready for Play Store publication.

SmartDukan - Shop Management App for Retailers | Flutter · Dart · Gemini API

- Built an inventory and shop-management app aimed at small shopkeepers in Pakistan, most of whom aren't well served by existing English-first inventory tools.
- Added barcode scanning with mobile_scanner so shop owners can add stock to inventory without typing product details by hand.
- Built an invoice/receipt photo-scanning feature that reads a photographed bill and pulls out the line items automatically.
- Added an Urdu-language AI chatbot using the Gemini Flash API for basic queries and help, since most target users are far more comfortable in Urdu than English.
- Set up AdMob for monetization across the app.

TECHNICAL SKILLS

Primary	Flutter & Dart: state management with Provider and BLoC, local storage with Hive and sqflite, Shared Preferences
Backend / APIs	Firebase (Auth, Firestore), Gemini API, REST / HTTP
Tools	Android Studio, VS Code, Git & GitHub, Ubuntu/Linux dev environment
Other Languages	Java, Python, C++

EDUCATION

BSc Computer Science (8th Semester, Expected 2026)

National University of Modern Languages (NUML), Lahore Campus

Intermediate — ICS 2022 | Punjab College, Lahore

Matriculation — Computer Science 2020 | Beaconhouse — The Educators

LANGUAGES

English (Professional) • Urdu (Native) • Punjabi (Native)
